ARAUCO Moulding is precision-milled for consistent high-quality results and exceptional on the job performance.
ARAUCO manufactures the industry’s most comprehensive selection of composite panels, premium plywood, millwork, lumber, and wood pulp.

With roots in sustainable forest product solutions and a commitment to our customers’ success, ARAUCO has grown to become the second largest wood panel producer in the world.

Today, ARAUCO brings more than a half-century of manufacturing excellence and innovative product development to the North American market. With its global logistics, operations and service footprint, ARAUCO is well-positioned to deliver a superior level of service and to build mutually beneficial, lasting relationships with its customers.

ARAUCO’s Sustainable Practices

- ARAUCO Moulding comes from certified, sustainably managed plantation forests.
- ARAUCO makes full and responsible use of available forest resources and does not use any native forests or genetically modified trees.
- Verified legal origin.
- Respect for the rights of indigenous peoples.
- USDA Lacey Act compliant.
- Compliant with EPA TSCA Title VI /CARB-2.
- Mills powered by carbon neutral, biomass-generated green power.

ARAUCO North America

ARAUCO combines leading-edge, precision manufacturing with responsive customer service in order to provide the North American market with sustainable forest product solutions.

ARAUCO offers unparalleled access to sustainably produced premium plywood, medium-density fiberboard, high-density fiberboard, particleboard, millwork, and lumber.

ARAUCO North America imports ARAUCO products through 22 major ports of entry, and ships to more than 3,500 destinations across the continent.

In addition to imported products ARAUCO North America has operations across the United States and Canada.

NORTH AMERICA
Regional Support Centers
- Atlanta, GA
- Albany, OR
- Fort Mill, SC
- Markham, ON
ARAUCO Moulding, with its wide range of products, offers limitless design combinations, giving homeowners the best solutions in interior space decoration.

VERSATILITY
ARAUCO Moulding offers the industry's broadest and deepest selection in millwork, including ultralight MDF mouldings, solid mouldings, finger-joint mouldings, jambs, frames, edge-glued boards and shiplap. ARAUCO Moulding also offers a variety of time-saving treated moulding products which are moisture, termite and fungal-decay resistant to be used in exterior applications.

No matter what the profile calls for, from modern to classical, ARAUCO Moulding offers designers and contractors a vast palette to choose from. More than 4,000 ARAUCO Moulding products across all architectural styles mean the right, new or replacement product is available.

CONSISTENCY
With more than 20 years of experience in millwork production ARAUCO Moulding mills are continuously improving, using the most recent technology ensuring precise and consistent profile appearance. The single-source manufacturing ensures predictable profile production and product consistency while the substrate composition supports better installation outcomes requiring less repairs and more durability.

EXCEPTIONAL ON-THE-JOB PERFORMANCE
ARAUCO Moulding provides users with top industry leading quality and on-the-job performance. All ARAUCO Moulding manufacturing facilities follow the same standardized procedures and use ARAUCO’s own Radiata Pine resulting in excellent appearance and workability. This helps contractors reduce installation time, eliminate product surprises, satisfy homeowners and dramatically reduce callbacks.

Made exclusively from Radiata Pine grown in ARAUCO’s sustainably managed plantation forests, ARAUCO Moulding products maintain a lightweight feel and consistent color for predictable performance and better installation outcomes.
Ultralight MDF Moulding

ARAUCO Ultralight MDF Moulding is precision engineered for superior quality and high performance.

Available throughout North America in a wide variety of standard and custom profiles, ARAUCO Ultralight MDF Moulding is a great choice for painted trim applications in residential and commercial projects.

Product Features

• Ultralight density: 32 lb/ft³
• Superior workability – easy to cut, miter, nail and finish
• Precision milled – free of raised grain, trimbacks and defects
• Smooth, ready-to-paint Jesso primed surface
• TSCA VI / CARB 2 compliant
• Made from pine fiber grown in ARAUCO’s sustainably managed plantation forests

ARAUCO Moulding is the right choice for every building professional. With thousands of patterns and profiles, including jambs and edge-glued boards – ARAUCO Moulding is precision-milled for consistent, high-quality results and exceptional on-the-job performance.

ARAUCO understands what building professionals, as well as home owners, are looking for in moulding quality, value, consistency and selection. ARAUCO wants customers to know that they stand behind their products as the selection of moulding and millwork is unmatched for uniformity and quality. So much so that the ARAUCO Moulding name is stamped on the back of every single piece of moulding.
**Solid Moulding**

ARAUCO Solid Moulding is made from 100% clear, solid Radiata pine for a consistently straight, knot-free product.

Available throughout North America in a wide variety of standard and custom profiles, ARAUCO Solid Moulding is the best choice for trim with a natural or stained appearance.

**Product Features**
- Made from 100% Radiata pine
- Natural light color
- Smooth, knot-free quality
- Uniform acceptance of stain.
- Consistently straight
- Optimal tally for fast installation and less waste - RL units heavy on 14'- 16' lengths
- Made from pine grown in ARAUCO’s sustainably managed plantation forests

**Finger-Joint Moulding**

ARAUCO Finger-Joint Moulding is precision milled for superior quality and high performance.

Available throughout North America in a wide selection of standard and custom profiles in Radiata pine, ARAUCO Finger-Joint Moulding is a great choice for painted trim applications in residential and commercial projects.

**Product Features**
- Wide variety of finishes – Primed, Prefinished
- Virtually no defects, due to state-of-the-art finger-jointing and moulding processes
- Combined shipments with Solid Moulding, Jambs, and Edge-Glued Boards
- Made from 100% Radiata pine grown in ARAUCO’s sustainably managed plantation forests

**Jambs & Frames**

ARAUCO Jambs and Frames are made from high-quality Radiata pine.

Available throughout North America in a wide variety of options – flat, split, and rabbeted jambs – ARAUCO Jambs and Frames are the best choice for interior and exterior door applications.

**Product Features**
- Made from high-quality Radiata pine
- Wide variety of finishes – Raw and Primed
- Available with Applied Stop and Weather Strip
- Hinge & Strike Machining Capabilities
- Combined shipments with Solid Moulding, FJ Moulding, and Edge-Glued Boards
- Made from pine grown in ARAUCO’s sustainably managed plantation forests
Edge-Glued Boards
ARAUCO Edge-Glued Boards are made from Radiata Pine for a consistently straight, smooth product. Available throughout North America in a wide variety of finishes and sizes, ARAUCO Edge-Glued Boards are the best choice for interior and exterior trim applications.

Product Features
• Wide variety of finishes – Raw, Primed, Oil Primed, Rough Sawn
• Consistently straight
• Smooth, sanded finish
• FJ edge-glued with fingers on the edge, not the face
• Available thicknesses 21/32”, 23/32” and 5/4”
• LOSP treatment available for exterior applications
• Combined shipments with Solid Moulding, FJ Moulding, and Jambs & Frames
• Made from pine grown in ARAUCO’s sustainably managed plantation forests
